FSC Certified TiO₂ Titanium White Trim boards added to Boston Cedar Green Product Offering

JUNE 1st, 2009 Holbrook, MA: In an effort to consistently introduce third party certified products, Boston Cedar and Millwork is pleased to announce that it's TiO₂ Titanium White trim board has achieved FSC Chain of Custody Certification.

TiO₂ Titanium White starts with a kiln-dried, finger-joint and edge-glued, 100% defect free radiata pine board using one of the best time-tested adhesives available. The two step coating system starting with an application of penetrating oil sealer/primer followed by a zero VOC acrylic topcoat ensures long term durability and dimensional stability of the board.

Blocks and Cutstock S.A., which is the single source substrate supplier for TiO₂ Titanium White, has attained chain of custody status under the Forest Stewardship Council (Visit www.fsc.org for more information.), Sustainable Forest Management Certification for its operation in Conception, Chile.

With SCS-COC-001671, Boston Cedar and Millwork is uniquely qualified to deliver an additional FSC certified product to its base of accounts throughout New England, New York and Northern New Jersey. The Forest Stewardship Council (FSC) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.
