

Here's What Retailers Are Saying About

I think it was excellent. All of the contractors that showed up were all top notch builders and they all mentioned they loved it. it was one of our better meetings in a long time. Thank you for hosting it for us.

Scott Brock, Brocks

Thank you so much for sponsoring the green road show event. This event was extremely popular, and the interest from our customers was truly outstanding. We had around 100 people in attendance, with over 40 others on a waiting list. Because of the overwhelming turnout we are looking forward to holding this a second time. John Wagner was on top of his game, and he held the attention of everyone for the entire presentation.

Robert Hall, Purchasing Director

In a matter of an hour and a half, John was able to "demystify" much of the green building thoughts my staff had. He explained in simple, understandable terms the why, how, where and when of the green movement, and enabled my staff to realize and capitalize on all we currently offer that is green.

Cory Poulin, Poulin Lumber Inc.

John did a fantastic job at the seminar on Monday. Feedback from customers and our employee team were 100% positive. A big thanks to Boston Cedar for bringing John Wagner to us.

Mary Rankin, Ward Lumber

About John D. Wagner:

A Vermonter, John D. Wagner is the award-winning author of 12 books on green building, construction, woodcrafts, home building, the supply chain, and corporate management. As a journalist, he has written more than 1,100 articles for construction trade journals. Currently, John is the green editor for LBM Journal; he is also the content manager for the nationally renowned Certified Green Dealer program, a program he co-founded. He is also a green building consultant and sales trainer whose clients include lumber chains and dealerships, large and small. A sought-after speaker for industry events, John is also the green building columnist for Qualified Remodeler magazine and Residential Design & Build magazine. John is also Adjunct Professor of Architecture, Norwich University in Northfield, Vermont.
