

Doug Fir

Douglas Fir

One of the many outstanding characteristics of Douglas Fir is its warm rosy red color and its remarkably straight grain pattern. Depending on the given need, Douglas Fir can be used for structural applications or interior millwork. Douglas Fir also machines cleanly and can hold all types of stains and finishes exceptionally well. With the ability to be used both indoors and out, Douglas Fir is the one of the most versatile and dependable materials for nearly any building project.

Outstanding Features

- When Douglas Fir is milled to expose the vertical grain, the result is a consistent straight grain with a beautiful light red color that darkens in time.
- The color of the exposed surface as well as the quality of the manufacturing process and moisture content are all keys in determining the grade of the finished board.
- While C & Better is a very acceptable grade, B & Better by grade rule has a more uniform color and a much tighter grain pattern. Generally, the tighter the grain pattern, the greater the long term durability and coating adhesion.
- Douglas Fir holds fasteners exceptionally well and retains its size with an absolute minimum of shrinking, swelling, cupping and bowing.
- Clear vertical grain Douglas Fir is very well suited to accept a variety of coatings and finishes.
- Douglas Fir flooring easily withstands consistent harsh weather and is a very dependable option for high foot traffic areas. It resists scuffing and abrasion and it has become a New England classic for generations because of its durability.

Facts

- One of the many outstanding characteristics of Douglas Fir is its warm rosy red color and its remarkably straight grain pattern.
- Depending on the given need, Douglas Fir can be used for structural applications or interior millwork.
- Douglas Fir also machines cleanly and can hold all types of stains and finishes exceptionally well.

Stock Program

- B and Better Flooring
- C and Better Flooring
- Boards:
 - 1 x 6 - 1 x 12 6' - 20' R.O.E.L.
- Dimension Lumber:
 - 2 x 4 - 2 x 12 6' - 20' R.O.E.L.
- Beaded Ceiling
- Assorted Deck Accessories such as Fir Stepping and 4 x 4's are also available.
