

RDI Endurance Railing

Original Rail™ is the cornerstone of the Endurance product line. The most complete system of railing kits is coupled with a variety of accessory brackets that allow installation to any surface at any angle. Simple form and dependable function unite these rail designs to maintain safety without sacrificing the elegant presentation of your home or commercial space. No detail is too small, and we've considered them all, down to the tamper-proof screw head covers. The vinyl extrusions with aluminum stiffeners add strength and durability to the top and bottom rails, while the unique, patented locking pin design provides secure, invisible attachment of the aluminum reinforcements to the building structure. Original Rail exceeds U.S. Building Code requirements and is backed by **certified third-party quality assurance and ICC-ES evaluation report ESR-1849**.

Deck Rail™ is the ultimate combination of superior design and beauty. We've set a new standard in the vinyl railing industry with our innovative wide cap design an optional decorative feature that beautifies and serves as an active surface on your deck while barbecuing or relaxing. Made from a durable composite material with the look of freshly-painted wood, the cap was designed to provide a continuous clean line over the intermediary newel posts. The accessory bracket kits provide flexibility to your unique railing installation, offering solutions for mounting to round columns or angles ranging from 0° to 45°.

Porch Rail™ offers safe, quality railings that you and your family can depend on while allowing you to easily design a beautiful, unique look that will be the envy of the neighborhood. Porch Rail is low-maintenance and easy to install, while it also allows you to express your own, personal style. Just choose your top cap (textured for painting, factory-finished white, or custom mill your top cap in any wood species or composite deck board) and pick from our multiple baluster options. Porch Rail's unique design allows easy wiring installation for lighting or speakers, and the hidden brackets complete the look for an exciting, sleek design without exposed hardware.
